SUMMARY

I am a Software Engineering student with a background in Information Technology and hands-on experience in computer support and practical ICT tasks. I am interested in software development, backend systems, and technical problem solving, and I enjoy learning through real projects. With strong communication skills, multilingual ability, and a solid academic background, I am ready to contribute to a professional technology team.

EXPERIENCE

Tampere UAS School Project

- Embedded Systems / IoT Project: Worked with UART and I2C communication, troubleshooting hardware and software integration **2024 - Current**
- Linux Server / Cloud Project: Configured and maintained a Linux cloud server environment
- Backend / Database Project: Practiced database design, querying, and system logic development
- Mobile / Software Development Project: Worked with modern development tools and programming concepts in practical assignments
- Python / SQL / database projects

SKILLS

- Python
- SQL / SQLite
- Linux
- Git / GitHub
- HTML / CSS / JavaScript
- Problem Solving

EDUCATION

Tampere University of Applied Sciences (TAMK) - Tampere **09/2025 - Current**

- Bachelor's Degree Program in Software Engineering

South-Eastern Finland UAS (TAMK) - Mikkeli **09/2024 - 04/2025**

- Degree Programme in Information Technology
- GPA: 4.82

Bui Thi Xuan High School - Ho Chi Minh **09/2021 - 04/2024**

- Top Student Academic Achievement Award 2021, 2022, and 2023
